

ASPIRING IT PROFESSIONAL

Looking for an exciting opportunity with an ambitious company where I can apply my knowledge and skills in IT operations, network management and application development to handle projects/assignments within professional contexts

PROFILE & VALUE

- Dynamic and passionate IT professional with a strong foundation in the IT domain, holding a Master of Information Technology from the University of Technology Sydney (UTS), with a specialisation in Cyber Security and Internetworking.
- Gained practical hands-on experience in IT operations on academic projects that include advanced areas such as machine learning, cloud computing, IoT security, and network design.
- Hands-on experience in configuring and troubleshooting network and application servers, managing network devices, and supporting end users.
- Demonstrate a deep understanding of
 - key network functions, including network maintenance and support, routing protocols, VLANs, and NAT configuration
 - key software technologies including Python, JavaScript, HTML, CSS, Visual Studio Code, Apache Server, Cisco Packet Tracer, GNS3, Cisco Modelling Labs (CML) and cloud platforms like AWS and Salesforce

SKILLS SNAPSHOT

- IT operations
- Network configuration
- Support and troubleshooting
- Network maintenance
- IoT and Machine learning
- Web application development
- Database operations
- Infrastructure management
- MATLAB simulation
- Technical support
- Problem-solving
- Time management
- Strong work ethic
- Effective communication

EDUCATION & CREDENTIAL

Professional
Year Program
2025 - Present

- **Professional Year Program (IT)**, Performance Education, Sydney
 - Completed structured workplace readiness training aligned with Australian professional standards
 - Developed strong business communication skills (professional emails, meetings, presentations)
 - Gained hands-on internship experience in a real organisational environment
 - Strengthened teamwork, problem-solving, time management, and adaptability skills
 - Enhanced understanding of workplace compliance, ethics, and professional conduct
 - Built industry networks and improved overall job-readiness for the Australian market

Masters
2023-2024

- **Master of Information Technology with a Major in Cyber Security and Sub-Major in Internetworking**, University of Technology, Sydney
 - **GPA:** 6.88 out of 7.00
 - **Major Achievements:** Obtained Two Dean's List honours

Bachelors
2018-2022

- **Bachelor of Computer Science and Engineering**, American International University, Bangladesh
 - **CGPA:** 3.95 out of 4.00
 - **Research:** IoT-Based Automated Fish Farming System for Flooded Area under Prof. Shahrin Chowdhury 2021-2022
 - **Major Achievements:** Obtained "Summa Cum Laude" award and five Dean's List honours

Certifications

- **CS50 Cybersecurity: CS50's Introduction to Cybersecurity**, HarvardX, Harvard University, 2025
- **Mobile Automation Testing Training Certificate**, QAMON, Bangladesh, 2022
- **CCNA Training Certificate**, CISCO, 2022
- **SQAT Training Certificate**, SoftologyiT, Bangladesh, 2021

CAREER PROGRESSION

July 2022 – July 2025

Digilyzent

Network Administrator

Highlights

- Administer, support, enhance, secure, and ensure the availability of the network systems infrastructure that supports the company's corporate enterprise network.
- Troubleshooting and fault resolution relating to application software and corporate infrastructure.
- Patching and monitoring to ensure system availability, reliability, security, and performance.
- Administer & manage Windows Server (AD, Group Policies, DNS/DHCP), Office 365.
- Administer & manage networking infrastructure (routers, switches, firewalls, VPN, Wireless Access Points)
- Assist with the design and implementation of new infrastructure solutions. Proactively identify and recommend process improvements.

May 2023 – Present

CAMP Australia

Educator

Highlights

- Supervised and cared for children before and after school, ensuring a safe, supportive, and engaging environment while planning weekly programs and holiday activities.
- Managed daily operations, including staff rosters, menu planning, administrative reporting, record keeping (medication, incidents), and supply ordering.
- Maintained strong communication with parents and management, providing updates on children's development, behaviour, and well-being.

Key Achievements:

- Recognised as Cultural Champion (2024 and 2025) for promoting inclusivity and cultural awareness.
- Led a service to achieve a Meeting Rating, demonstrating strong compliance and team leadership.

2020 – 2021

American International University, Bangladesh

Teaching Assistant Intern

- Extended necessary assistance to faculty with lesson planning, classroom management and the delivery of web technology and databases-related coursework
- Supported students with technical queries, reinforcing understanding of core IT concepts and practical applications
- Managed classroom resources and prepared instructional materials, including online tutorials and instructional videos, to facilitate a smooth learning experience
- Efficiently managed department meetings, including preparing agendas, recording minutes and following up on action items

ACADEMIC PROJECTS

- **Project:** Cyber Attack Detection in IoT Network Using Machine Learning | **Project description:** A machine learning-based system aimed at creating a robust detection mechanism to accurately classify various types of cyber-attacks including DDoS, phishing and man-in-the-middle attacks, and provide early warnings to mitigate potential risks | **Tools and Technologies used:** Python, Machine Learning, IoT Security and Network Traffic Analysis | **GitHub Repository:** [Cyber Attack Detection in IoT Network Using Machine Learning GitHub Project](#)
- **Project:** Dynamic Online Car Rental System | **Project description:** Development of an online system, that allows users/buyers to browse and search for cars, make reservations, and manage orders efficiently | **Tools and Technologies used:** HTML, CSS, JavaScript, PHP, AJAX, JSON, MySQL, Visual Studio Code, Apache Server | **GitHub Repository:** [Dynamic Online Car Rental System GitHub Project](#)
- **Project:** Online Grocery Store Website | **Project description:** Development of a fully functional and responsive online grocery store website with all features including search box, item categories, shopping cart, delivery details, and order confirmation | **Tools and Technologies used:** HTML, CSS, JavaScript, PHP, MySQL, Apache Server and Visual Studio Code | **GitHub Repository:** [Online Grocery Store Website GitHub Project](#)
- **Project:** Scalable and Fault-Tolerant Web Application Development using AWS for a Start-up | **Project description:** Development of a scalable, elastic, and fault-tolerant web application architecture for a start-up transitioning from a traditional

LAMP stack to the AWS cloud | **Tools and Technologies used:** Amazon Web Services (AWS), Elastic Beanstalk, EC2, RDS, Auto Scaling, Load Balancing, VPC, Cloud Architecture, System Security, Application Deployment and AWS Infrastructure Management

- **Project:** Cloud-Based Order Management System | **Project description:** Development of a cloud-based Order Management System for POL-Mart, an e-commerce grocery business, using the Force.com platform as part of a group project | **Tools and Technologies used:** Force.com (Salesforce PaaS), Cloud Computing, PaaS, Data Modelling, Workflow Automation, Cloud Application Development, System Security and Process Automation
- **Project:** Configuration and Troubleshooting of Routing Protocols using GNS3/CML | **Project description:** Configuration and troubleshooting of various routing protocols in a simulated network environment using GNS3 and Cisco Modelling Labs (CML) | **Tools and Technologies used:** GNS3, Cisco Modelling Labs (CML), EIGRP, OSPF, BGP, Policy-Based Routing (PBR), Route Filtering and Route Redistribution | **GitHub Repository:** [Configuration and Troubleshooting of Routing Protocols GitHub Project](#)
- **Project:** Network Design and Implementation | **Project description:** Design and implementation of comprehensive network infrastructure using Cisco Packet Tracer including creating IPv4 addressing schemes, configuring OSPFv2, implementing VLANs and configuring NAT | **Tools and Technologies used:** Cisco Packet Tracer, OSPFv2, Static Routing, VLANs, NAT, Routers, Switches and PCs (simulated in Packet Tracer) | **GitHub Repository:** [Network Design and Implementation GitHub Project](#)
- **Project:** Smart Farming using NarrowBand IoT (NB-IoT) | **Project description:** Development of a smart farming system to address the challenge of signal blockage in farms by using NB-IoT to ensure robust data collection and transmission | **Tools and Technologies used:** MATLAB Simulation Environment and NarrowBand IoT (NB-IoT) | **GitHub Repository:** [Smart Farming using NB-IoT GitHub Project](#)
- **Project:** Processing a Hosts File with Python | **Project description:** Development of a program that processes a text file containing IPv4 addresses and hostnames | **Tools and Technologies used:** Python | **GitHub Repository:** [Processing a Hosts File with Python GitHub Project](#)
- **Project:** Tic Tac Toe | **Project Description:** Developed a 2D Tic Tac Toe game using computer graphics techniques, implementing interactive gameplay with a visually appealing UI. Designed and programmed the game logic to handle player moves, win conditions, and draw scenarios | **Tools and Technologies Used:** C++, OpenGL, Computer Graphics | **GitHub Repository:** [Tic Tac Toe GitHub Project](#)
- **Project:** 4-Way Traffic Light System (IoT & Embedded Systems) | **Project Description:** Designed and implemented an IoT-based traffic light control system using microprocessors and embedded systems. Simulated real-world traffic light operations for four-way intersections, integrating timing logic and automated signal transitions | **Tools and Technologies Used:** Microprocessors, Embedded C, IoT, Circuit Design | **GitHub Repository:** [4-Way Traffic Light GitHub Project](#)
- **Project:** Covid-19 Vaccination Form | **Project Description:** Developed an interactive Covid-19 vaccination registration form, incorporating multimedia elements for a user-friendly interface. Designed to collect and validate user data efficiently, ensuring accessibility and responsiveness. | **Tools and Technologies Used:** HTML, CSS, JavaScript, Multimedia Integration, Form Validation | **GitHub Repository:** [Covid-19 Vaccination Form GitHub Project](#)
- **Project:** Hospital Management System | **Project Description:** Developed a web-based Hospital Management System to streamline patient records, doctor appointments, and administrative tasks. Implemented a user-friendly interface with secure database management for efficient hospital operations | **Tools and Technologies Used:** HTML, CSS, JavaScript, PHP, MySQL, Web Development | **GitHub Repository:** [Hospital Management System GitHub Project](#)
- **Project:** Graveyard Management System | **Project Description:** Designed and developed a Graveyard Management System to efficiently manage burial records, plot allocations, and maintenance schedules. Implemented a structured database for secure data storage and retrieval | **Tools and Technologies Used:** MySQL, SQL Queries, Database Design | **GitHub Repository:** [Graveyard Management System GitHub Project](#)
